

Tony Blair gained leadership of the Labour Party after the Sudden Death of John Smith.

One of his biggest achievements came in 1998 with the Northern Irish peace process really made progress with the Good Friday Agreement.

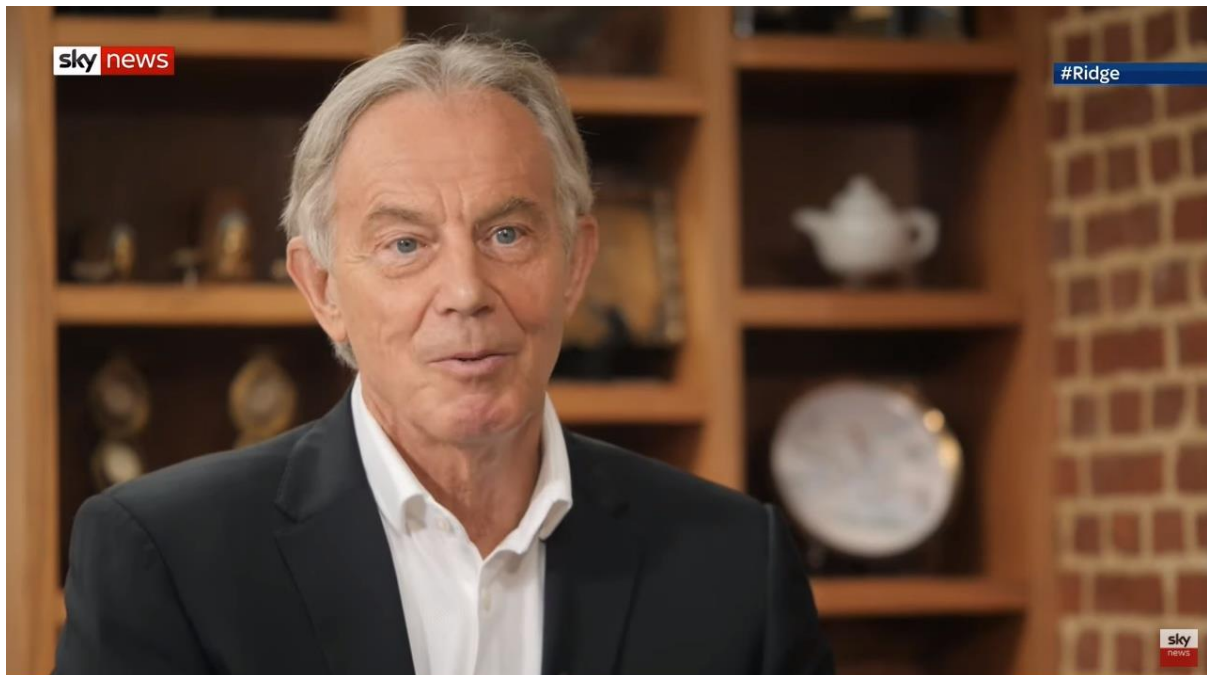

In his first 6 years of office, Tony Blair sent British troops into combat five times, more than any other prime minister in British history. These included Iraq in both 1998 and 2003, Kosovo (1999), Sierra Leone (2000) and Afghanistan (2001)

Since the Iraq War Tony Blair has been the subject of many war crimes accusations after the Chilcot Report exposed the Dodgy Dossier that was used to convince the British Parliament and public into believing the existence of WMD'S in Iraq.
